Lawrence Textile Strike (1912)
Financial capital - Wikipedia
Financial capital (also simply known as capital or equity in finance, accounting and economics) is any economic resource measured in terms of money used by entrepreneurs and businesses to buy what they need to make their products or to provide their services to the sector of the economy upon which their operation is based, e.g., retail, corporate, investment banking, etc.

Monopoly - Understanding How Monopolies Impact Markets
A monopoly is a market with a single seller (called the monopolist) but with many buyers. The commodity produced by the monopolist requires a large quantity of skilled labor for its production, and skilled labor is in short supply. Capital Markets & Securities Analyst (CMSA)®

Capital (economics) - Wikipedia
In economics, capital goods or capital consists of "those durable produced goods that are in turn used as productive inputs for further production" of goods and services. At the macroeconomic level, "the nation's capital stock includes buildings, equipment, software, and inventories during a given year." A typical example is the machinery used in factories.

Monopoly in the Long-Run
Monopoly in the Long-Run In the long-run, all input factors are assumed to be variable, making it possible for firms to enter and exit the market. The consequence of this entry and exit of firms was that each firm's economic profits were reduced to zero in the long-run.
